OVERVIEW

01 INTRODUCTION

What is Championship History Tracker?

A championship history tracker is a software tool designed to store, manage, and display information about past championships in various sports or competitions.

It allows users to track the winners, runners-up, and other relevant details of championships over time. In this you come across through all championship details of certain sports and games.

Components of Championship History Tracker

Data Model
Define the structure of championship data, including fields like name, year, winner, runner-up, and any additional details.

Database Setup
Set up a database management system (e.g., SQLite, MySQL) to store championship records. Create tables to store championship data.

User Authentication and Authorization
Implement user authentication and authorization mechanisms to control access to certain features or data. This ensures that only authorized users can perform CRUD operations or access sensitive information.

Search and Filter Functionality
Implement search and filter functionality to allow users to search for specific championships or filter data based on criteria such as year, sport, or country.

Backend Development
Implementing CRUD operations.
Create , Read , Update , Delete.

HISTORY OF CHAMPIONS IN CERTAIN SPORTS

Sports we have chosen for this project
